

Terrorist Attack Checklist

Be Prepared

- Create a codeReady Plan that includes a Stay Plan and a Go Plan (which one you use will depend on type of attack).
- Build a 3-day codeReady Kit. (You may need to take part or all of this kit with you if you leave your home.)
- Plan and practice an evacuation from your home as well as your local area with your family ahead of time.
- Learn where emergency exits are located in buildings where you work or spend a significant amount of time.
- Be prepared to do without services you normally depend on (for example, electricity, phone, natural gas, cash register, ATM, Internet)

Prevent Attacks

- Be aware of your surroundings at all times.
- Move or leave if something does not seem right. Report any suspicious activity to authorities.
- Take precautions when traveling.
- Do not accept packages from strangers.
- Report unusual behavior or unattended packages.
